MATHEMATICS 9709/62

Paper 6 Probability & Statistics 2

February/March 2025

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

#### **INSTRUCTIONS**

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

### **INFORMATION**

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [ ].

This document has 16 pages. Any blank pages are indicated.

2 A researcher records the time, T seconds, taken by adults to complete a questionnaire.

The results for a random sample of 60 adults who completed the questionnaire this year are summarised as follows.

$$n = 60$$
  $\Sigma t = 3678$   $\Sigma t^2 = 226313.36$ 

Find an unbiased estimate of $E(T)$ , and show that an unbiased estimate	of $Var(T)$ is 14.44.	[3

The random variable X has the distribution Po(1.5).

(a)	Find $P(X \ge 3)$ .	[2]
<i>a</i> .		
(b)	Find the probability that the sum of three	independent values of $X$ is between 3 and 5 inclusive. [3]

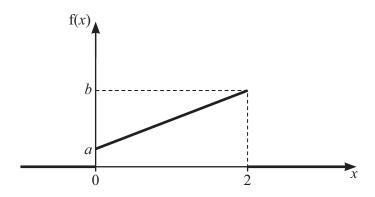

(c) The sum of a large number, n, of values of X is denoted by T. Using a suitable approximation, it was found that P(T > 330) = 0.0391, correct to 3 significant figures.

ind the value of $n$ . [5]	]

4 (a)

8

The diagram shows the graph of the probability density function, f, of a random variable X. The graph is a straight line from (0, a) to (2, b), where a and b are positive constants. Elsewhere, f(x) = 0.

(i)	Show that $b = 1 - a$ .	[2]
		•••••
(ii)	Given that $E(X) = 1.2$ , find the value of $a$ .	[5]
		•••••
		•••••

		•••••
		•••••

**(b)** A random variable T has probability density function given by

$$g(t) = \begin{cases} \frac{1}{2}\cos t & -\frac{1}{2}\pi \leqslant t \leqslant \frac{1}{2}\pi, \\ 0 & \text{otherwise.} \end{cases}$$

9

Find the value of c such that $P(-c < t < c) = \frac{1}{2}$ .	[4]

9709/62/F/M/25

Amir believes that 20% of the students at his college are left-handed. His friend believes that the true proportion, p, is less than 20%. Amir plans to use the binomial distribution to test the null hypothesis,  $H_0$ : p = 0.2, against the alternative hypothesis,  $H_1$ : p < 0.2.

He decides to choose 35 students at random. If 3 or fewer of these students are left-handed, Amir will reject his belief.

(a)	Find the significance level of the test.	[3]
<i>a</i> \		
(b)	State the probability of a Type I error.	[1]

It is now given that the true value of p is 0.05.

Nikki is investigating the views of students at her school about the school sports facilities. She plans to 6 give a survey to a sample of students.

Nikki's friend says, "This survey is about sports facilities, so you should choose a sample of students from the school sports teams."

(a)	State, with a reason, whether you agree with Nikki's friend.	[1]
		•••••
	ki chooses an appropriate random sample of 60 students. She finds that 45 of the the sports facilities are good.	se students think
(b)	Calculate an approximate 95% confidence interval for the proportion of student the sports facilities are good.	s who think that
		•••••
		•••••

For a different investigation, Nikki uses another large random sample to calculate a 99% confidence interval and an x% confidence interval.

13

The width of the 99% confidence interval is double the width of the x% confidence interval.

(c)	Calculate the value of $x$ .	[4]
